

2-STALL SHOWER

UNIT DIMENSIONS

L: 18' W: 11' H: 10'6"

THE GOT TO GO TWO-STALL SHOWER UNIT is a simple solution for events such as weekend festivals or for use at certain job sites. This unit may be combined with additional luxury Restrooms for large events. Originally designed for disaster relief efforts, the Got To Go Two-Stall Shower Unit is the perfect choice for emergency situations or in any case where power and water sources are not readily available.

The Got To Go Two-Stall Shower Unit includes two unisex bathrooms each furnished with a sink, toilet, and shower. Whether used for a special event or emergency situation, Got To Go provide individuals with the comforts of home in clean, private, and spacious stalls.

The unique design of this shower unit gives them the mobility to go virtually anywhere. The Two-Stall Shower Unit is completely self-contained and operable using (2) 110 volt outlets or generator(s) for the lights, heat or air conditioner, and on-demand propane water heater. (Unit pulls a maximum of 20 amps.) Water is supplied by a spigot and garden hose or a 165 gallon on-board fresh water holding tank. The unit houses a 200 gallon waste holding tank; grey water from the showers can either flow directly into the waste holding tank or be diverted to a specific location on the ground. If operated from a continuous water source, the unit provides approximately 450 hot showers.

Rental options include daily, weekly, and long-term rentals, generators, and additional fresh water holding tanks.
